# CALDERA COLLECTION

PRIMAL WARMTH TRANSFORMS INTO A SCULPTURAL  
EXPRESSION FOR REFINED OUTDOOR SPACES

Patryk Koca

AUSTRALIA

Caldera is born out of the primal need for fire that always provided us with warmth and light. For millennia fire was at the centre of gatherings, reflection and feeling of safety when the sun goes down.

With practicality at the forefront of any design challenge, Patryk and SNOC developed an integrated ash receptacle which can be fitted with the Grill Set. The innovative floating grill allows cooking without obstructing access to the ambience of the fire.

Caldera brings this ancient feeling into the modern world, where style, substance and convenience go hand in hand during our downtime. Available in round or soft square, the design is fit for contemporary and classical patios, gardens or balconies. The sculpted cauldron flows under the monolithic volcanic shelves.
