# SESTRI COLLECTION

BOLD GEOMETRIES UNFOLD INTO A REFINED  
BALANCE OF RIGOR AND LIGHTNESS

Sestri is a collection composed of a director chair, a sun lounger and coffee tables inspired by the world of boating, defined by clean aluminum lines and refined Burma teak wood details.

## SESTRI-nightfall

Boats are highly technical objects: every detail serves a precise function, and from this necessity emerges an aesthetic that is essential, elegant, and unmistakable.

# SESTRI-bisque

The same logic has been applied to Sestri starting from a technical element and translating it into a sculptural language, defined by bold geometries and balanced proportions, in constant search of equilibrium between rigor and lightness.

Sestri-bisque Director Chair (Long Version)

Sestri-terra Director Chair

The result is a family of furnishings that is simple yet rigorous, aiming to transform simplicity into character and functionality into beauty.
